

# Best Practice Assessment

**A stable and secure IT environment is critical to productivity!**

**We don't pretend to know** what is best for you and your company, but we do know that implementing "IT best practices" results in a stable and secure IT environment. It is our experience that IT stability and security allow your staff to become more productive... ultimately resulting in increased productivity.

Our **Best Practice Assessment** is designed to compare your current IT environment and support model against industry standard IT best practices. We take a look at all aspects of your environment and provide you with recommendations for improvement.

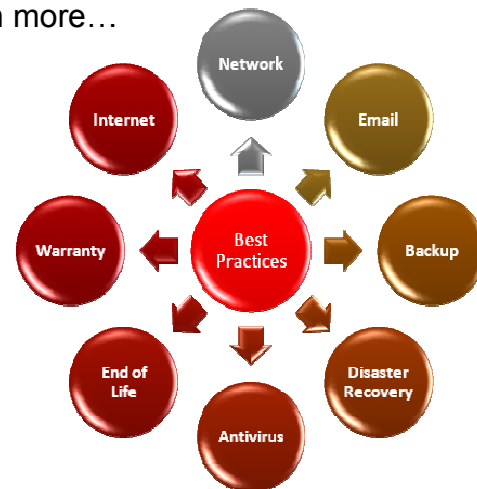

Our main focus with all our customer is to ensure that their networks are stable and secure. This is critical to employee productivity and ensuring minimal support costs.

As such, we offer a **FREE** assessment of your IT environment that focuses on just that, "the security and stability of your IT environment."

Our recommendations document provides an overview of each of these areas and whether or not it meets "IT best practices."

**In this assessment, we cover several critical areas of your network environment:**

- Network connectivity, configuration and security
- Email connectivity, configuration and security
- Backup and disaster recovery solutions
- Antivirus, anti-spam, and antimalware configurations
- Current service contracts and warranties
- Identify any IT related pain points you may be having
- Much more...
