MX Logic - Email/Web Defense

Reduce Business Risk and Cost

Email Defense Service

The never-ending battle to protect email communications from spam, viruses, and other threats can be particularly draining on organizations with limited IT resources or email threat expertise. Businesses that rely on efficient email communications can turn to MX Logic for help in eliminating the email threats that sap productivity, increase storage, bandwidth, and administrative costs, as well as put their networks at risk.

MX Logic Email Defense Service Features and Benefits:

- Spam Blocking
- Virus & Worm Scanning
- Fraud Protection
- Content and Attachment filtering
- Email Attack Protection
- Outbound Message Filtering

Three Levels of Defense:

- Ultimate
- Critical
- Enterprise

Web Defense Service

You just don't know who's out to get you. Operating without Web security increases your business risk from Web-based threats and unauthorized workplace internet usage. A proactive Web security solution is no longer "nice to have" but a "must have" for small and medium-sized businesses (SMBs).

Three Levels of Defense:

- **Threat Control** - Efficiently protect employees and network assets from harmful Internet-based threats.
- **Content Control** - Effectively monitor and limit non-work related Web surfing to help boost productivity, conserve network bandwidth, and reduce legal liability.
- **Total Control** - Economically bundle the Threat Control and Content Control packages for a comprehensive Web security solution.

With the Web Defense Service you can conduct business on the Internet more safely and cost effectively.
