CTS Technology Solutions Celebrates 25-Year Anniversary

SOUTHERN ILLINOIS AND ST. LOUIS — July 29, 2008 — CTS Technology Solutions, Inc., a leading business communications provider, announced today that the company is celebrating its 25th year in business. CTS Technology Solutions has become a fixture throughout Southern Illinois and St. Louis by building a strong reputation for meeting the voice, data, video, and surveillance needs of some of the region's most successful organizations. The company is dedicating the remainder of 2008 to celebrate its long history of providing exceptional service, building long term partnerships with its customers and being a pioneer in communications technology.

"We set our sights high from the inception of CTS Technology Solutions," said Mr. Heuman. "Most businesses fail within the first year and we have been truly blessed with our great fortune. We have had the unique opportunity to provide our service to a vast number of the region's businesses with a strong dedication to increase their profitability and give them a competitive advantage. The formula has paid off and we're proud of this tremendous accomplishment."

The growth of CTS Technology Solutions can be directly attributed to two critical areas of the business – people and managed services. From day one the company was determined to employ people solely focused on taking care of the customer. Not only did CTS Technology Solutions spend time identifying the right people but they also spent countless hours training them so they could expand their careers, gain incredible business knowledge to continually keep them at the forefront of a rapidly changing industry, and most importantly be viewed as a valuable asset

to the entire customer base while striving to meet their every need.

CTS Technology Solutions also attributes its success to CTS Complete, a total managed services offering designed to help companies stay on the cutting edge of technology. The purpose of CTS Complete is to eliminate the two greatest risks associated with technology – obsolescence and not knowing the ongoing cost of operating technology. CTS Complete eliminates these risks by giving organizations the unique ability to refresh or renew their technology any time after 24 months with no change in payment. Technology can be added as required within a fixed cost that can be absorbed by an organization's operating budget. Additionally, CTS Complete includes a vast array of professional services designed around a proactive relationship that addresses every need a customer may have. The program essentially allows the continued implementation of new technology within a set budget. Organizations understand their ongoing fixed cost of ownership and do not have to worry about being billed for requested services.

As an industry pioneer, CTS Technology Solutions has always positioned itself at the leading edge to capitalize on upcoming trends and market demand. As a result, two years ago the company changed its name from CTS to CTS Technology Solutions. Recognizing that the company provides a wide range of technological solutions that can support every aspect of an organization, the name change supports an all encompassing consultative approach to their customers' technology needs.

Recently, CTS TECHNOLOGY SOLUTIONS expanded its operations in the St. Louis marketplace by adding the

customer base as well as the team of professionals from a company that had to close its doors. This strategic move enables the company to provide its services to an even greater universe, while adding several very talented people that have strong, existing relationships with some of the top organizations in the community.

"This is probably the most exciting time in the history of our company," added Mr. Heuman. "We're entering into a new chapter with a lot of great people. The technology changes that occur in this industry are absolutely phenomenal because they create opportunities for all of our customers to accomplish their strategic objectives at a much faster rate. It is our job to show them the way - successful mission that we established 25 years ago."
